Hello! I am Aline-Butterfly. I have a picture. You can see an apple, a banana, grapes, a pear, a lemon, an orange and a plum. But I have got no paints. Maybe my friends have got paints?

Look! This is a frog. He lives in the lake.
— Hello, Frog! What colour have you got?
— I have got a green colour. Here you are.
— The pear is green, too! Thank you!

3. Ты помнишь, где живут другие Алины? Создай странные предложения, чтобы получились предложения.

The frog	—	in the tree.
The chicken	—	in the lake.
The ladybird	lives	in the house.
The cat	—	in the river.
The fish	—	with his mother.

One afternoon, Aunt Polly said, "Polyanna, take this jelly to Mrs. Snow. She's a poor invalid."

After that, Polyanna visited Mrs. Snow often. They started playing the glad game. Mrs. Snow felt happier.

Polyanna also took jelly to Mr. Pendleton. She said, "Mrs. Snow's a Melting invalid. You're not! Aren't you glad?"

"I am," he answered.

Dr. Chilton smiled.

Dr. Chilton gave Polyanna a ride home. Polyanna thought, "Dr. Chilton has sad eyes." "You have the pleasant kind of work!" Polyanna said. "Gladdest? I see sick, sad people every day!" he crowed. "You help them every day!" she said, happily.

Dr. Chilton lived alone. He never had children. But he enjoyed seeing Polyanna and hearing about her glad game.

Picture Dictionary

1 Oceans of the World

There are five oceans, and they cover about 70 percent (70%) of Earth. Oceans and their seashores are different all around the world. On the Arctic Ocean and the Southern Ocean there's a lot of ice in winter. In warm tropical oceans you can find colorful coral reefs with many plants, fish, and other sea life.

An ocean is always moving because of waves, currents, and tides. When the wind blows over the water, it makes waves. Currents are large amounts of warm or cold water that move around the ocean. An ocean also moves up the seashore and back again two times a day. These movements are called tides.

A Crab

Eyes help to protect animals from other animals. The crab has two eyes on top of its body. It can see big animals, and then it can run away.

The blue whale is the biggest animal in the world. It can be more than 30 metres long! It moves well in the ocean because the water holds it up.

Go to pages 24–25 for all tides.
